Field Technician / Carpenter

Description

Star Exteriors is expanding!

We specialize in roofing, siding, windows & gutters and as a general contractor, our main focus is Insurance Restoration.

Star Exteriors has consistently provided superior craftsmanship, while keeping a clear and honest relationship with the customer. It does not matter if you have years of experience or will be new to this type of industry – the team is here to support and train you. We will provide you with a full comprehensive training manual, software and apps specific to this industry, supplies needed to make sales, Star Exteriors shirt and hat, office space if needed to complete paperwork, on and off site training and more.

Why is Star Exteriors a great place to work?

- Fully functional CRM platform, with access to work orders and project documents electronically
- Professional work vehicle, tooling and equipment that will give this teammate access to everything needed to support our Clients
- In House Estimator, Production Manager and Admin staff to ensure projects move quickly and accurately through to completion
- A visionary owner who wants to build a reputable, customer-service focused company who gets positive feedback from clients and partners

If you want to learn more about how we are working to build upon our solid reputation in the industry, give us a call.

Responsibilities

- Manage project calendar
- Assess and complete field labor tickets per required scope and timelines as scheduled
- Add notes within the CRM, and pictures, to validate that work has been successfully completed
- Coordinate with the Production Manager on scope changes, and help provide resolution that allows our Company to properly mitigate both cost and time adjustments
- Maintain the Company work vehicle to be a professional, clean representation of Company (interior and exterior)
- Manage scheduling of basic work vehicle preventive maintenance (oil change, tires, coolant, etc)
- Help provide visibility with shop hardware and component stock, giving advance notice to Production Manager when supplies need to be re-ordered to stock for field projects
- Provide visibility when tooling requires repair and/or replacement
- Communicate promptly, professionally and adequately with both internal and external stakeholders
